Formats and product identity

Distinct forms carry their own ingredient and acceptance criteria.

Lychee is supplied in the formats below. The signed purchase specification identifies the chosen form, ingredient declaration, processing status, size/grade, pack, destination and intended use.

Product format	Primary acceptance focus	Website
Whole IQF / standard frozen fruit	Size, intact fruit, defects, maturity and frozen separation	View example ↗
Peeled / prepared form	Peel/seed clearance, flesh integrity and colour	View example ↗

Category identity

Botanical source: Litchi chinensis. **Source control:** country, growing area, farm/harvest lot and crop year are matched to the approved purchase specification. **Storage:** Frozen formats are maintained at ≤-18°C with shelf life assigned to the approved pack and order.

Whole and cut formats retain separate size, defect and packing schedules. Any anti-browning treatment, processing aid or addition is stated in the signed product and label specification.

Farm to finished pack

Source, process and cold-chain records stay linked to each lot.

Station	Control and retained record	Hold or correction
Source approval	Approve farm/origin, water, crop-protection record and harvest hygiene.	Hold unqualified sources or incomplete spray records.
Harvest / reception	Identify lychee source lot, harvest date and fruit condition; exclude decay and foreign matter.	Segregate and decide acceptance against signed raw-fruit criteria.
Prepare / inspect	Wash and sort; peel, core, de-seed or segment as applicable. Control potable wash water and clean-zone separation.	Hold after water, trimming, foreign-material or cut-size failure.
Sort / IQF	Remove defects and foreign matter; freeze pieces individually and verify centre temperature after stabilization.	Re-grade, re-freeze or hold the affected window under approved disposition.
Pack / detect	Check form, weight, seal, label and validated finished-pack foreign-body detection.	Hold failed detector challenge, packaging or identity checks.
Frozen dispatch	Maintain product at ≤-18°C; record pallet, reefer, seal and logger links.	Hold unresolved cold-chain excursions.

Fruit-specific control: Shell and seed fragments; browning. The inspection schedule also monitors peeled flesh integrity, seed removal and colour.

The site HACCP plan and qualified line define process sequence, water monitoring, foreign-body challenge, hold window and release authority.

Numerical quality schedule

Measurable options are tied to their product form and source.

Published offer = listed GreenLand configuration. Negotiable option = a quoted grade to confirm for the order. Voluntary benchmark = external quality or procurement reference, not a certified grade. A lot result is supplied only in its issued COA.

Form / measure	Base range or limit	Source / check
IQF in-shell whole Count	PUBLISHED OFFER 20–27 fruits/500 g	GreenLand product page ↗ · Count representative weighed fruit
IQF peeled/pitted whole Count	NEGOTIABLE OPTION 50–70 premium / 70–90 standard pieces/kg	GreenLand product page ↗ · Count representative weighed fruit
IQF peeled/pitted whole Diameter	NEGOTIABLE OPTION 28–40 mm	GreenLand product page ↗ · Frozen sample; caliper or cut gauge
IQF peeled/pitted whole Intact Arils	NEGOTIABLE OPTION ≥90 %	GreenLand product page ↗ · Representative sample; count or mass as stated
IQF peeled/pitted whole Soluble Solids (°Brix)	NEGOTIABLE OPTION ≥14 processing / ≥16 Grade A / ≥18 premium °Bx	GreenLand product page ↗ · Thawed sample; refractometer at 20°C

Shared frozen controls: product thermal centre at or below –18°C after stabilization; frozen storage and transport at or below –18°C. Standard unopened frozen-pack shelf-life programme: 24 months where pack validation and the selected product specification support it. Freeze-dried forms use their separate dry-pack programme.

Obtain the complete grade and lot file

Tell us the product form, destination, intended use and pack. We will confirm the selected limits, sampling plan and actual lot COA.

Food safety and seven markets

Priority hazards and national rules are checked against the selected form.

Biological controls: Water source, harvest hygiene, wash-water quality, clean-zone separation and environmental monitoring are specified by the site HACCP plan. Freezing is not a pathogen kill step. [C1,C2]

Chemical and physical controls: pesticide applications are traced from the farm record to the destination residue panel; metals, processing aids and packaging are assessed for the product form. Shell and seed fragments; browning is covered by sorting, maintenance and validated detection.

Market	Official route	Order-release check
EU	396/2005 residues; 2023/915 contaminants; 2073/2005 RTE microbiology	Active substance × fruit commodity; product form and intended-use category. [E1–E3]
US	EPA 40 CFR 180; FDA food/import controls	Named tolerance, importer and label. [U1]
Canada	Health Canada PMRA; CFIA processed-fruit rules	Named MRL, category and Canadian label. [A1]
Saudi Arabia	SFDA food-clearance guide and applicable national/GSO rules	Importer, label, required certificate and frozen form. [S1]
UAE	Cabinet Resolution 116/2024 pesticide schedules	Current analyte and fruit entry; food registration/label. [U2]
Japan	CAA pesticide residue standards	Current fruit MRL, residue definition and Japanese label. [J1]
South Korea	MFDS Food Code and MRL lookup	Specific fruit, group and applicable default rules; Korean label. [K1]

EU reference for the washed edible part: Pb ≤0.10 mg/kg; Cd ≤0.050 mg/kg (Fruit; Annex I 3.1.1.2 / 3.2.1.1). Confirm the current consolidated text and any processing factor for puree, concentrate, syrup or dried forms. Pesticide MRLs are assessed by active substance × commodity × destination. [EU 2023/915](#) ↗

Lot COA acceptance schedule

The identified batch receives its measured results after sampling.

COA item	Reference schedule	Lot result
IQF in-shell whole · Count	20–27 fruits/500 g	_____
IQF peeled/pitted whole · Count	50–70 premium / 70–90 standard pieces/kg	_____
IQF peeled/pitted whole · Diameter	28–40 mm	_____
IQF peeled/pitted whole · Intact Arils	≥90 %	_____
IQF peeled/pitted whole · Soluble Solids (°Brix)	≥14 processing / ≥16 Grade A / ≥18 premium °Bx	_____
Salmonella / L. monocytogenes	RTE or processing programme and destination criteria; method and sample mass declared	_____
Pesticide residues	Named actives, applicable destination MRL and laboratory LOQ	_____
Pb / Cd, EU reference	Pb ≤0.10 / Cd ≤0.050 mg/kg for Fruit; Annex I 3.1.1.2 / 3.2.1.1; processing and destination checked	_____
Product temperature / pack	Frozen core and distribution ≤-18°C; approved seal and declared net weight	_____

Issued-lot record: purchase order, source and lot code, production and sample dates, laboratory report, method, units, LOQ where relevant, actual result, decision and authorized signatory. Sweetened, liquid and freeze-dried formats use their respective additional analytical lines.

Forward trace

Farm block → intake lot → line and shift → finished lot → carton, pallet and shipment.

Reverse trace

Carton code → source, process and detector/water records → retained sample and customer shipment.

Request a completed batch COA

Send destination, selected product form, pack, intended use and shipment window. Actual values come from the identified lot.
